**TEK1000
LIGHTNING ARRESTER**

TEK1000 is a Solid Copper Air terminal lightning protection device of 300 mm long, connecting feature of 25 x 3 mm / 70 Sq mm down conductor internally assembled with 100 mm Spherical gap Copper ball with 4 numbers of flash protection spikes (10mm diameter 100 mm long).

Teksai TEK1000 lightning arresters working on a simple principle of Benjamin Franklin which states lightning charges nature of finding easiest path to earth from a nearest sharpest conductor from cloud clubbed with air gap balls which gathers charges from connected earth making lightning attraction more effective.

One entire system of TEK1000 can protect a built-up area of 3500 Sq Ft

TEK1000 is fixed with 300 mm long isolated fiber glass - reinforced plastic (FRP) mast. The isolated down conductor internally connected to the air terminal inside the FRP, 3 Meter GI Mast and base Setting used for top area setting, down conductor used with insulation will be connected to chemical earthing.

- ▲ *Provides air terminal fitted to an isolated fiberglass-reinforced plastic (FRP) mast.*
- ▲ *Our Specially designed Masts offer natural isolation properties, high strength for windy sites and low weight to minimize mast loading.*
- ▲ *Features lower-cost and Best Results at the typical shorter installation requirements.*
- ▲ *Maintenance free chemical earthing used for installation.*
- ▲ *Complies with EN 50164-1 and EN 50164-2.*
